DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 1 and 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osborn (US 6,543,637 B1; previously cited and applied) in view of Close (US 6,396,925 cited and applied for the first time).

Regarding claim 1, Osborn shows a cup holder comprising:

Art Unit: 2642

An open topped outer member (12) that is secured to a support (col. 3, lines 38 - 62);
an open topped inner member (14) that is slidably received and secured to the outer member (12);

the outer member (12) is adapted to receive a cup having a first size when the inner member is removed; and

the inner member (14) is adapted to receive a cup having a second size.

The front walls of the inner and outer members have an elongated opening through which a front of the cup is visible (clearly depicted in FIG. 1).

Osborn does not teach holding a phone. However, Close plainly teaches that cup holders are and can be adapted to be used with phones. Therefore, it would have been obvious even to one ordinary skill in the art at the time of the invention to modify the cup holders of Osborn to also hold phones as clearly taught and motivated by Close.

5. Claims 7-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osborn in view of Close as applied to claim 1 above, and further in view of Hecht et al. (Hecht; 5,848,820; cited and applied for the first time).

Osborn in view of Close differs from the claimed invention in that it does not explicitly mention a panel assembly pivotally movable between a closed position and an open position wherein the panel is disposed "generally" vertically in the closed position. However, Hecht plainly shows such a panel assembly (Figs. 2 and 3) that is pivotally movable between a closed position (Fig. 2) and an open position (Fig. 3), wherein the panel is disposed "generally" vertically in the closed position. Hence, it would have

Art Unit: 2642

been obvious for one of ordinary skill in the art to incorporate Osborn in view of Close into a pivotal panel as taught by Hecht, such that the modification allows the system to be stored in a storage bin when not in use.

Regarding claims 3-6 and 8-14, the combination of Osborn in view of Close or Osborn in view of Close and further in view of Hecht shows:
the inner and outer members having an opening on the bottom wall (see Figs. 5 and 6 of Close);
the inner member can have ears that are snap fit through openings in the outer member (see FIG. 1 of Osborn);
ribs, slots, and mounting tabs (see 50, 52, 54, 56, 22, 25, 24, 26, 28, and 30 in FIG. 1 of Osborn); and
the upper peripheral rims for the inner and outer members (see opening top in FIG. 1 of Osborn).

Since these new grounds of rejection are obviousness rejections, the applicants are respectfully reminded that the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

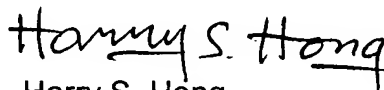

Response to Arguments

6. Applicant's arguments with respect to claims 1 and 3-14 have been considered but are moot in view of the new ground(s) of rejection.
